

Comment gérer les réseaux Wi-Fi avec Cisco Secure Client ?

Ouvrez le client Cisco Secure .

Cliquez sur le bouton  puis *Manage networks*.

Sélectionnez le Wi-Fi et cliquez sur *Edit* pour le modifier ou *Remove* pour le supprimer (attention, dans ce cas, il n'y a pas d'avertissement).

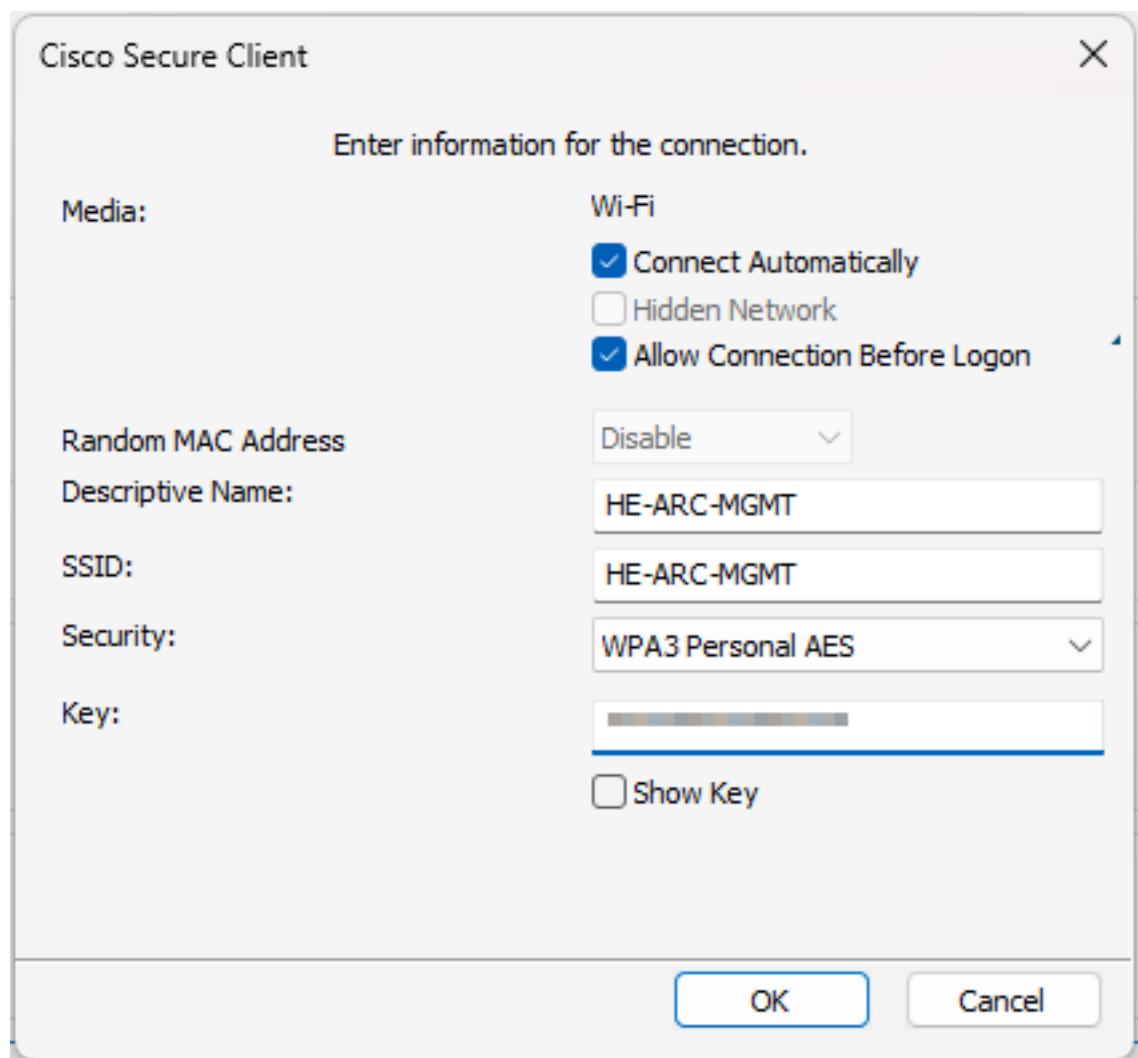

A screenshot of the Network Access Manager interface. The left sidebar shows 'Status Overview', 'AnyConnect VPN', 'Network' (selected), and 'Umbrella'. The main area is titled 'Network Access Manager' and has tabs for Configuration, Log Settings, Statistics, and Message History. It shows network service and Wi-Fi status as Enabled. Below is a 'Saved Networks' table with the following data:

Name	SSID	Security	Type	Privileges
[REDACTED]	[REDACTED]	[REDACTED]	Wired	Administrative
[REDACTED]	[REDACTED]	[REDACTED]	Wi-Fi	Administrative
[REDACTED]	[REDACTED]	[REDACTED]	Wi-Fi	Administrative
[REDACTED]	[REDACTED]	[REDACTED]	Wi-Fi	User Network
HE-ARC-MGMT	HE-ARC-MGMT	WPA3 Personal AES	Wi-Fi	User Network

At the bottom are 'Add', 'Edit' (highlighted with a red box), and 'Remove' buttons.

Vous pouvez éditer votre Wi-Fi

Cliquez sur *Ok* pour valider vos modifications.
